Subject: Rate increase sought for Pennichuck Water Works, Inc.

EXTERNAL: Do not open attachments or click on links unless you recognize and trust the sender.

To Whom it may concern,

I received a copy of the proposed rate increase sought by Pennichuck Water Works and would like to let you know my main concern against this increase.

I love recycling and am doing my best to not only keep unnecessary things out of landfills by recycling but also teaching those around me to try to make a difference by recycling more and more things as well.

A while ago, our recycling station informed everyone that recyclable items cannot be accepted any longer unless they are clean so I have made it a new habit to soak, rinse out, and sometimes even run items like tin cans through the dishwasher to be able to still add everything to the recycling and it not being rejected.

This of course costs me (and everyone else, should they choose to also recycle and use water to clean their items for recycling) more water and money. Should Pennichuck increase their rates again, I am afraid it might have a negative impact on just how much (more) people, including myself are willing to spend on water toward this.

I would kindly ask you to take this into consideration while debating to let this rate increase happen or not.

Thank you so very much for your attention in this matter
Sincerely

Gertie Johnson
